

Welcome to GlobeTrotter

Please note the application is currently in its 'alpha' testing stage and is therefore a rough demonstration of features to be included in the final version

This application is designed to support your natural exploration through a city. As you walk around, **points of interest (POIs)** with a chosen radius will pop up around you, encouraging you to discover new places. You can **add your friends** and view their recommendations on the map. So, if you are travelling alone or in a group, you can **connect with people you meet** along the way to share your hidden gems! Finally, by adding good quality recommendations to the map, you can **earn points and get rewards**.

Once you have read the following guide, follow this link to complete the 3 short challenges: <https://issyduggan.github.io/GlobeTrotter/>

STEP ONE: CREATE A PROFILE

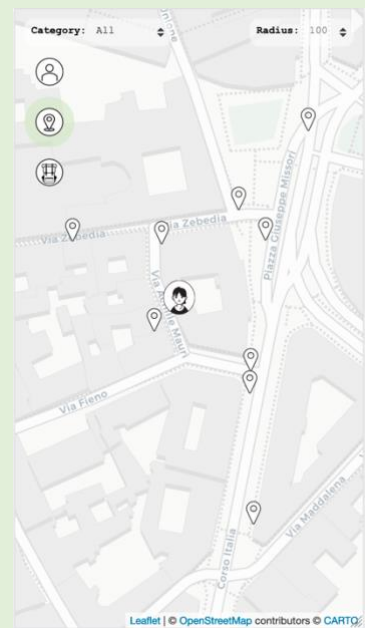

1. Register your email*

*Email must be in correct format (e.g. 'johnsmith@gmail.com') and password must be at least 6 letters

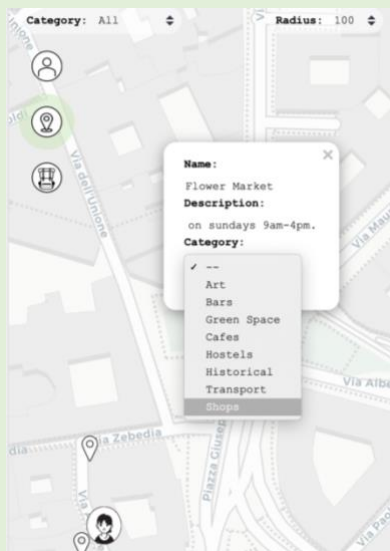

2. Build a profile and choose an avatar

3. Explore the map

STEP TWO: ADD YOUR RECOMMENDATIONS TO THE MAP

You can only view and add POIs within a radius around your current location - if adding a point does not seem to be working, you may need to adjust the radius here!

Double click on the map to add a place name, give it a description and categorise it. Click on the tick below it to see your point on the map

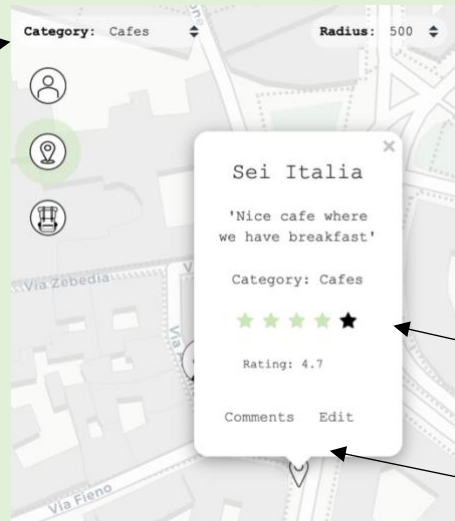

Top tip: A green trail shows you where you have been in case you want to go back somewhere!

First challenge:

Go for a walk around your neighbourhood and add in 3 points of interest (POIs) you would like to share with friends.

STEP THREE: FILTER THE POINTS YOU WANT TO SEE/VISIT A POINT

Filter the POIs you want to see

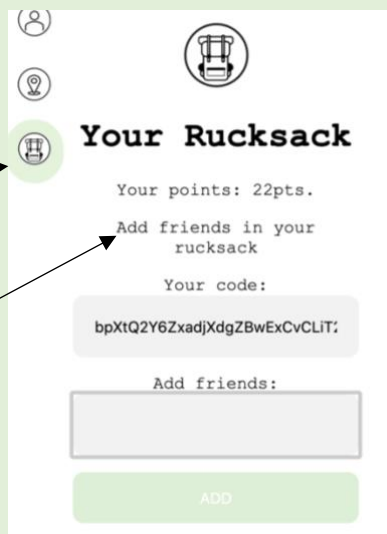

Rate the usefulness of the POI and leave a comment

Second challenge:

Use the filter to find 1 POI you would like to visit. Rate the usefulness of that POI and leave a comment.

STEP FOUR: ADD A FRIEND

This is your rucksack where you are able to connect with other travellers

Every 5 POIs you add, you can add a friend

Further rewards are given for adding highly rated POIs

Share your location with friends!

Third challenge:

Go into your rucksack and use this code to add me as a friend

TptI7kcnHlafWS04jqsikKmC0On2

Once you have completed the challenges, please follow the link to a questionnaire about your experience of the application (roughly 5 mins)

<https://forms.gle/dh8E7iwJaYYvixcB6>

Thank you!
