

The user has opened a file.
There is one MuseScore app icon visible in the dock.

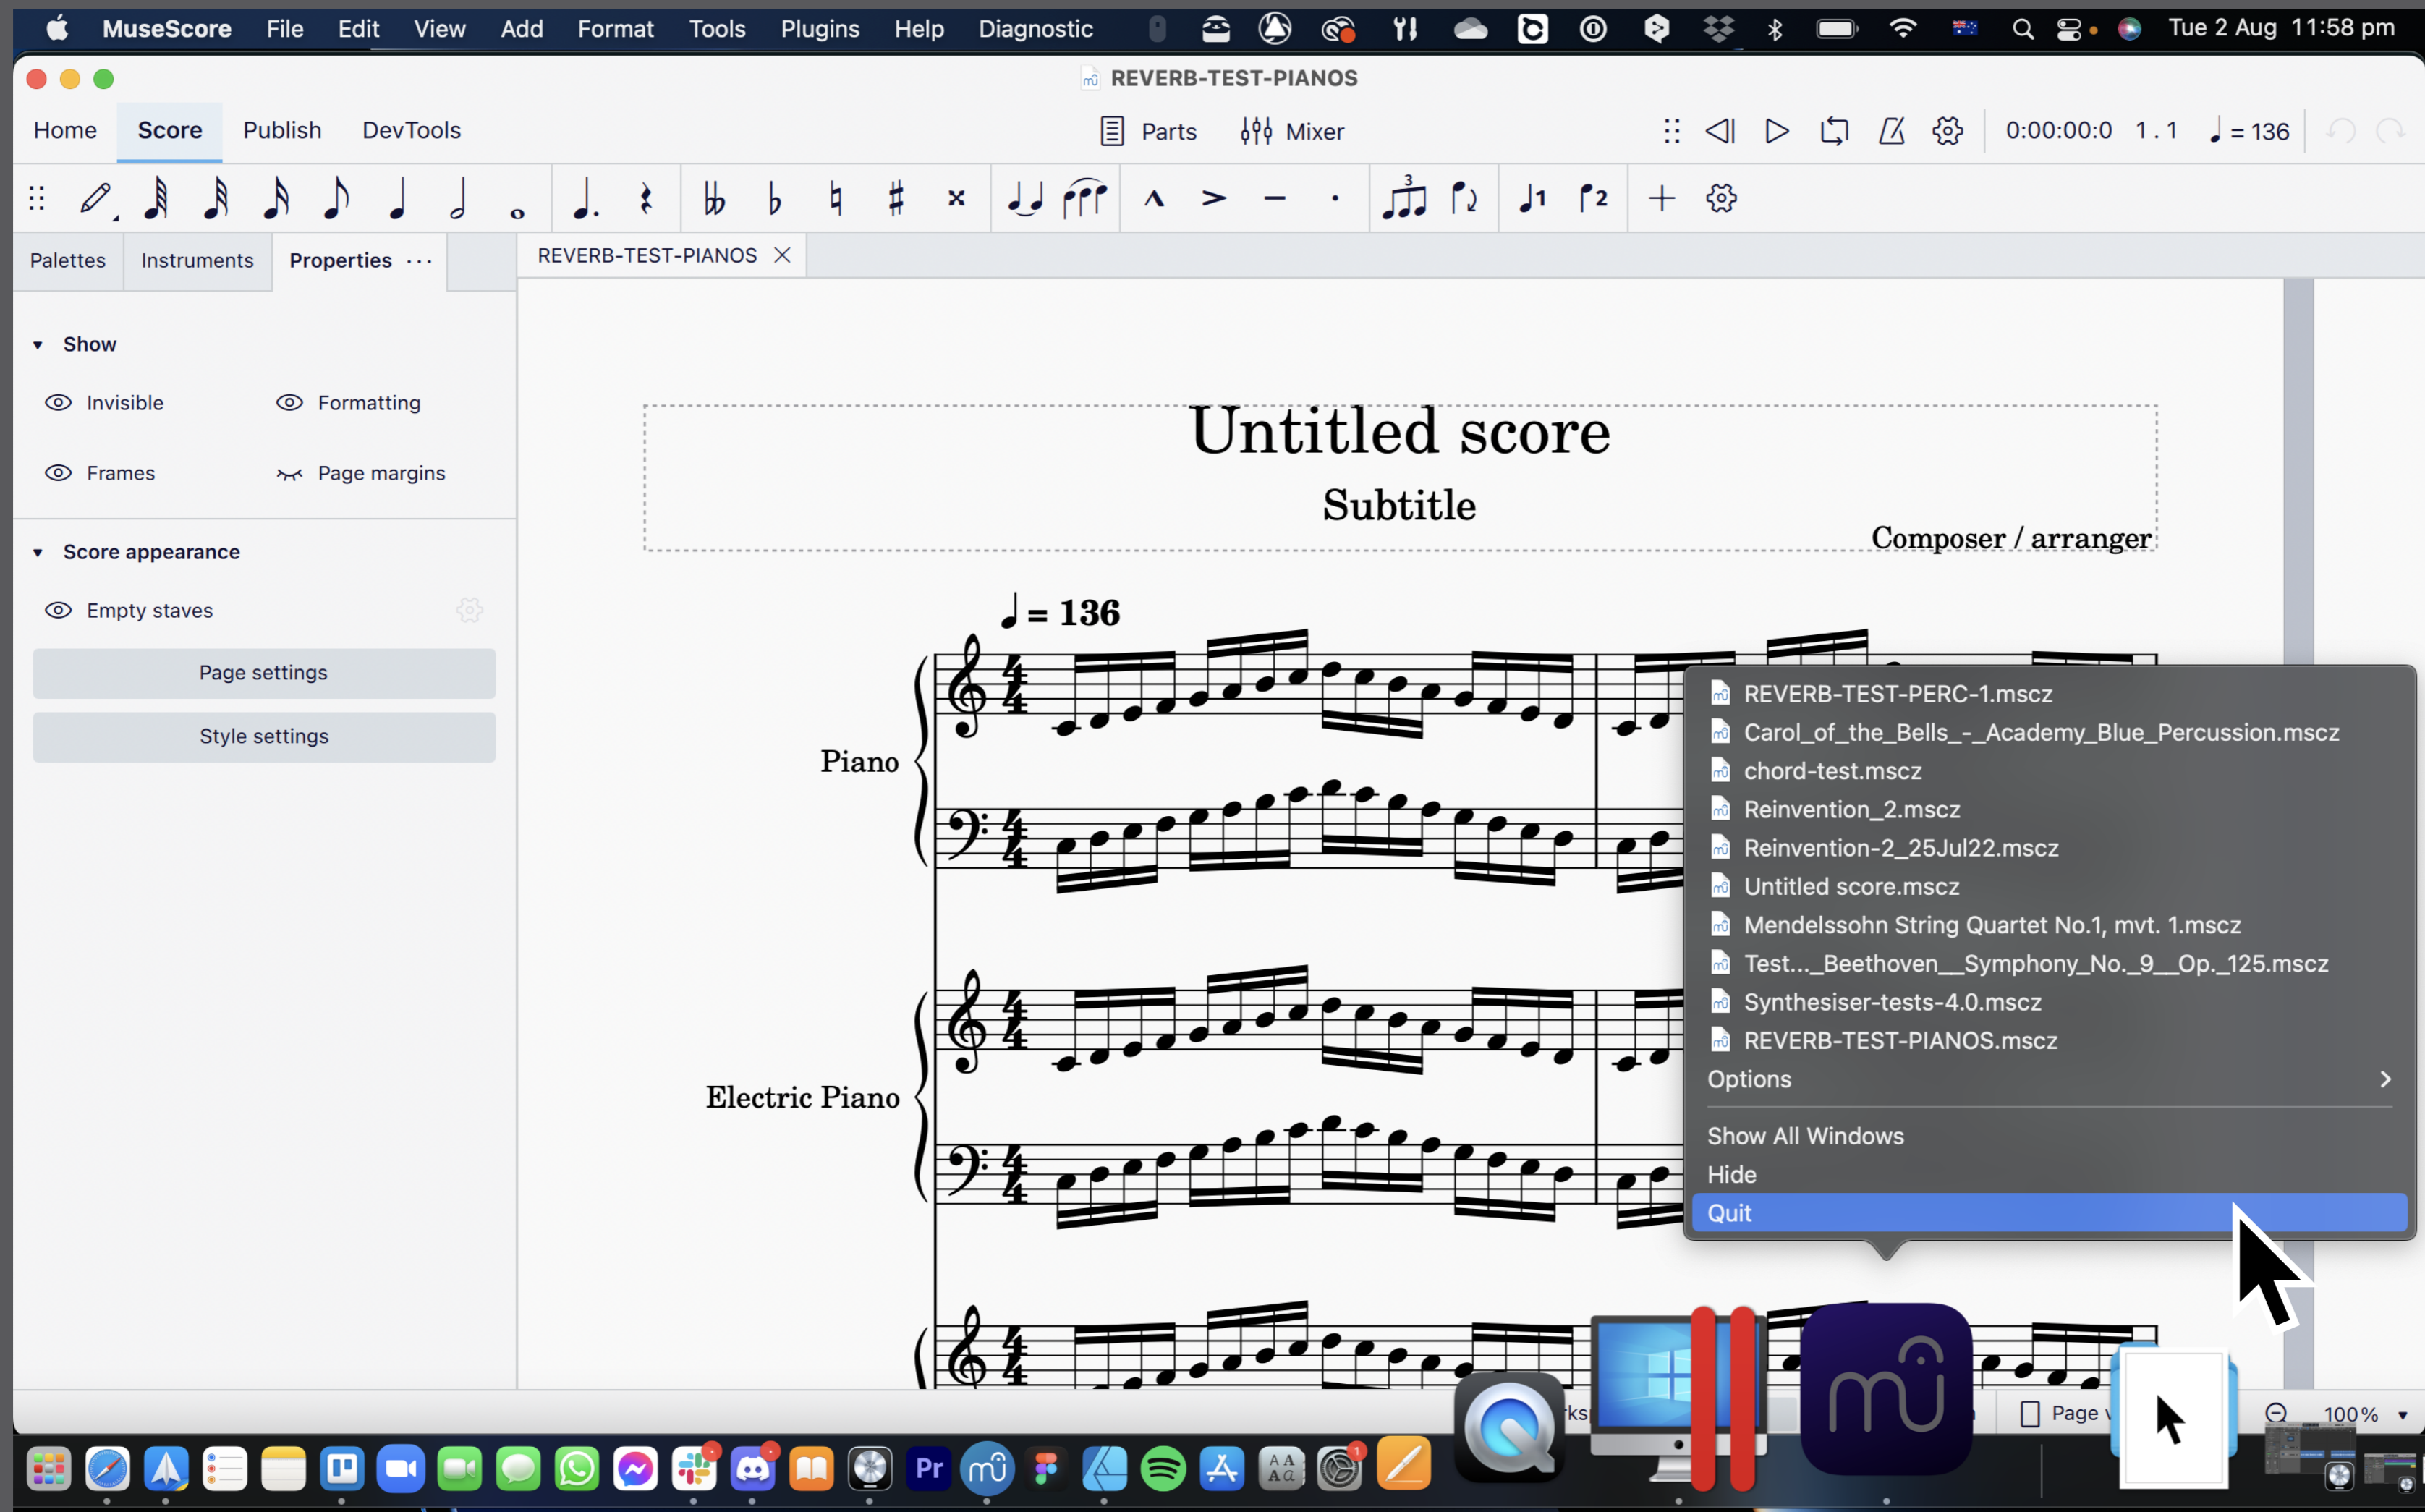

The user opens another MuseScore file

Note: this could be via any of the regular means, including:

- File > New
- File > Open
- File > Open recent

The new file opens as a new window over the existing one.
No loading screen appears.
There remains ONLY ONE MuseScore app icon in the dock.

When the user right-clicks on the app icon in the dock and selects QUIT, or Quits the app via any other means, the QUIT command will affect all open files.
