

# amatic.js

---

Simple and beautiful ajax notifications/loaders – Renan Diaz, 2017

Amatic.js Ajax notification/loader made easy

amatic.js is a cool and customizable notification for an ajax event.

## Basic Usage

---

1. Include the script and stylesheet on your document's , Font-Awesome and jQuery are required for this plugin:

```
<head>

<link rel="stylesheet" href="amatic.css">

<link rel="stylesheet" href="font-awesome.min.css">

<script src="jquery/3.2.1/jquery.min.js"></script>

<script type="text/javascript" src="jquery.amatic.js"></script>

</head>
```

2. To initialize the plugin:

```
<script> $(document).amatic(); </script>
```

3. Syntax:

```
jQuery(document).amatic( [CSS RULES], [OPTIONS] );
```

4. You can define new CSS Rules for the notification/loader like this:

```
var css = {background-color: "black", color: "white" };

$(document).amatic(css);
```

Or:

```
$(document).amatic({background-color: "black", color: "white" });
```

5. And modify the options availables:

```
<script>
$(document).amatic(css, {
    newclass: "",
    fade_in: false
});
</script>
```

6. Animations:

```
<script>
$(document).amatic(css, {
    animate_in: "bounceInUp",
    animate_out: "bounceOutDown}"
});
</script>
```

# Options
